

THE SHAMA *WNTCG* PROJECT

CULTIVATING CLARITY THROUGH GENEROSITY

WWW.WNTCG.ORG

* Shama

Shama (שָׁמָע) means to hear, to listen, to give attention, to understand, to submit, and to obey.
This Hebrew word is also generally translated as “hear”.

//01

Genesis 3:10
Deuteronomy 4:33
1 Samuel 13:4
Isaiah 66:8
Amos 4:1
Micah 3:9

Mission

Cultivating Clarity Through Generosity

Empower our mission to spread the good news without distraction
using the latest technology to provide crystal clear evangelism tools
through high quality sound.

//02

“How can they **believe in Him
if they have never **heard** about Him?
And how can they **hear** about Him
unless someone tells them?”**

Romans 10.14

//03

Our Story

In this new era of church online, we have a compelling need. Our outdated sound system hinders our mission to share the good news without distraction. Picture our team getting last-minute system failure updates before going live for our services, or live streams with distracting sound issues.

We believe The Shama Project holds the solution. With your support, we can acquire a new sound system for immersive worship, crystal-clear sermons, and engaging live streams.

Help us engage a new generation and connect more people to God's transformational power. Together, we can make a difference.

The Challenge

- ▶ Outdated and unreliable sound system causing sound inconsistencies during church services.
- ▶ Lack of expandability options to meet modern needs.
- ▶ Inability to record multitracks from church services and events.
- ▶ Inability to control the online live stream broadcast mix separately from the main mix in the church building.
- ▶ Inability to conduct virtual sound checks for the live stream.
- ▶ Faders dropping and malfunctioning during church services, leading to sound inconsistencies.
- ▶ Unreliable system with sound check mixes not matching the actual church service.
- ▶ Poor sound quality on the platform affects musicians and singers' ability to hear themselves properly making it challenging to deliver their best.
- ▶ Constant system failures minutes before the start of the service, causing distress and delays.
- ▶ Inconsistent and generally poor quality of the live stream sound.

The Solution

- ▶ **Feel immersed in distraction-free worship**
Experience a sound that centres you in the presence of God.
- ▶ **Hear crystal-clear sermons that touch your soul**
Allow us to amplify life-changing messages for profound impact.
- ▶ **Share unforgettable moments with confidence**
Let us deliver your experience to loved ones as you heard it.
- ▶ **Feel energised to evangelise and powerfully connect others to worship**
Share immersive live streams with those who need it most.
- ▶ **Ignite faith in a new generation**
Embrace modern sound and technology to engage the senses and aspirations of those being drawn to God.

The Solution

▶ **Encounter versatile sound tailored for every occasion**

Trust us to set the perfect atmosphere for all your events.

▶ **Foster creativity and talent development**

Capture the hearts and minds of Gen Z and millennials as we invest in their creative potential through mentorship and training.

▶ **Enhance accessibility for individuals with hearing impairments**

Implement sound technology solutions that ensure full engagement of individuals with hearing impairments.

▶ **Preserve the legacy of our church**

Gain valuable historical archives that help us reflect, build and empower future generations through recorded assets.

New Features

► Improved Sound Experience for Our Congregation

Clear sound with the capability to achieve beautiful vocal blends, and balanced instrument levels to engage the congregation on a deeper level.

► Independent Online Live Streaming Mix

Optimise sound specifically for online broadcasts, delivering a high-quality mix customised for our online congregation to enhance their livestream worship experience.

► Accessibility Features for Hearing Impaired

Connect hearing loop systems for high-quality audio signals, enhancing inclusivity within the church community.

► Multitrack Recording

Capture every detail of our services with built-in multitrack recording, presenting opportunities for post-production, team reviews of services and rehearsals, and the distribution of sermons to online streaming platforms.

New Features

► **Advanced Digital Mixing**

Experience a new level of control and flexibility with our cutting-edge digital mixer, ensuring clear and consistent sound for our church services and events.

► **Customised Monitor Mixes**

Tailor sound to musicians' individual needs, enhancing performance and stage presence for everyone on the platform.

► **Firmware Upgradability**

Future-proof system with easy firmware updates for access to the latest advancements in audio technology.

► **Increased Exposure**

Producing a high quality broadcast sound opens opportunities for partnerships with renowned media outlets like the BBC and Sky for significant exposure, attracting a larger audience to our worship experiences.

Let's Do This Together

Did you know it only takes
100 members to give £200
towards The Shama Project
to reach our target.

Imagine how quick we can
make change with everyone's
support!
